Buy the best input devices for a Mac

Keyboard

What to consider?

- Amount of keys
- Stability of the keyboard
- Position of the keys
- If it is wireless

The best one is the SteelSeries M800 Mechanical

- Includes mac specific keys so it is regularly used for macs.
- It is seeing as one of the fastest keyboards because its actuation point is lower than the rest of the keyboards.
- It has a big spacebar.
- It is not wireless

Mouse

What to consider?

- How limited is the space where the mouse is going to be.
- Design.
- Functionality of the mouse.

The best one is the Trackpad

- It has specialized flat surface capable of
- detecting finger contact.
- It does not use LED or laser sensor.
- It has different finger gestures.
- It is also ideal for limited spaces.

WebCam

What to consider?

- Maximun video resolution
- Maximum video capture speed
- Focus type
- Audio quality
- Still image resolution (megapixels)

The best one is the Logitech HD Pro C920

- It can focus up to 1080 p
- It shoots and streams in 1080p at 30 fps
- It focus by itself, meaning that it autofocus the quality of the image by its own.
- It records dynamic stereo audio
- It produce stills at up to 15 megapixels.

Microphone

What to consider?

- Do I want or need headphones?
- Do I need them to do professional audio?
- Do I have enough space to have a stand alone type microphone?

- If you want professional audio and recording, we recommend the stand alone type of microphone. The best option would be "Audio - Technica AT2020".

Scanner

What to consider?

- It is compatible for all apple products.
- Portable and you can travel with it with all the facility.
- It's bluetooth and wifi direct.
- Touch screen.

The best option for a iMac computer, is the HP officeJet 250 Notebook Multifunction Printer

- It can scan, photocopy and print easily.
- It is also compatible with the iPhone and iPad.
- Can connect with Bluetooth Smart and Wi-Fi Direct technologies.
- It has a 2.65 inch touch screeen
- Automatic document feeder

Graphics tablet

What to consider?

- Display
- Pen
- Additional features
- Compatibility

The best one is the Wacom MobileStudio Pro 16

- 4k resolution (3840 x 2160)
- The pen has 8192 levels of pressure sensitivity and it is the most advanced on-paper feel.
- Used for 2D, 3D and CAD applications Multi-touch gestures
- Intel® Core™ i7 processor and 512GB of fast storage.
- Compatible with the most advanced programs
